

**SBA Certified Woman Owned Small Business,
Information Systems, Telecommunications,
Cybersecurity, Network Support Services Company**
CONNECTING YOUR AGENCY TO THE TECHNOLOGY RESOURCES YOU NEED

SaiTech is an information technology (IT) engineering, operations, technical support, cybersecurity and consulting services company. Since its inception, SaiTech has been continuously working on IT support contracts in support of government agencies. Through its extensive government contract experience, the company has built a proven past performance and excellent track record. We are highly rated by our customers for the quality of our employees and the work they perform. SaiTech has a presence at various locations throughout the United States including the Washington DC metro area; Pasadena and Goldstone, California, Fort Worth, Texas; Stennis Space Center, Mississippi; Goddard Space Flight Center, Greenbelt, Maryland; Marshall Space Flight Center, Huntsville, AL, and White Sands Test Facility, White Sands, New Mexico. Our experience with managing contracts at multiple locations makes SaiTech a great partner in satisfying any government agency's technology needs no matter where the project is located.

Technical Excellence, Performance and Responsiveness
20 YEARS OF EXEMPLARY EXPERIENCE ON GOVERNMENT CONTRACTS

SaiTech brings a legacy of more than 20 years of providing IT support services to the Federal Government. Experience includes seven contracts supporting NASA at the Marshall Space Flight Center (MSFC), Jet Propulsion Laboratory (JPL), NASA Shared Service Center (NSSC), Stennis Space Center (SSC), and Goddard Space Flight Center (GSFC). Other agencies supported include the Department of Homeland Security Customs and Border Protection, Springfield, VA; Department of Defense Office of the Inspector General, Arlington VA; Defense Contract Management Agency, Columbus OH; Bureau of Engraving and Printing, Washington, DC; Navy Seaport IDIQ contract; and the Army Corps of Engineers, Huntsville AL. On these contracts, we have provided the full scope of IT support including: network (LAN/WAN) support; telecommunications and telephone services; cable plant management; engineering and implementation of voice, data, and video services; cybersecurity; software applications support; software and website development; network and applications server support; electronic document management; records management; network security; intrusion detection; information assurance; IT help desk support; and mission services engineering.
